EDUCATION

Stony Brook University

Bachelor of Science in Computer Science

Expected May 2028

GPA: 3.51/4.0

- **Relevant Coursework:** Data Structures, Analysis of Algorithms, Systems Programming (C), Software Development

EXPERIENCE

Undergraduate Researcher, UI/UX Engineering

Aug 2026 - Present

MOCA Lab, Stony Brook University

- Develop in the Java/Android codebase of a smartwatch/phone app that captures Activities of Daily Living (ADL) labels from older adults in real-home sensing deployments
- Diagnosed timestamp inaccuracy in phone-based virtual-button capture and recommended moving start/end marking to smartwatch buttons, cutting each mark from **4 steps (lift, read, tap, lower) to a single press**
- Design accessible input paths that reduce motor and memory load, including optional speech input and confirm-don't-recall prompts
- Author the v1 interface spec for the labeling flow ahead of user trials; present design rationale to the PI and research team weekly

System Staff Student Assistant

Jun 2026 - Present

Department of Computer Science, Stony Brook University

- Run a self-hosted Xibo digital signage platform (Docker, WSL2, Tailscale) across 4 department displays, from initial deployment to remote content updates
- Reimage **40+ lab machines** (FOG, Ventoy) and help deploy Palo Alto PA-410 firewalls replacing failing hardware
- Write step-by-step troubleshooting docs that let student staff resolve issues without escalation

PROJECTS

CS Account Search - Internal Staff Tool | *PHP, SQL Server, IIS, TypeScript*

Aug 2026

- Rebuild the CS department's internal account-search tool, used by staff to look up accounts and email active/expired status by NetID, name, or email across staging and master tables
- Redesign it for fast repeat lookups as a single page with fetch-based inline results, format-aware placeholders, inline validation, and loading, empty, and error states
- Audited the legacy PHP endpoint and identified **SQL injection and XSS risks** from unvalidated inputs; proposed whitelisted fields and parameterized queries

DatPone - Photobooth Web App | *Next.js, TypeScript, WebRTC, Framer Motion*

Jul 2026

- Build a photobooth web app in Next.js and TypeScript with **WebRTC phone-as-camera streaming**, so any phone can act as the booth camera
- Implement a reusable React component library and motion-driven UI (animated login, 3D photostrip hero) from a custom Figma design system

Phreddit - Full-Stack Social Platform | *React, Node.js, Express, MongoDB*

Jan 2026 - May 2026

- Led the React frontend and component architecture, built in three phases (vanilla JS, React SPA, full MERN)
- Fixed a stale-state bug that flattened nested comment threads until refresh, restoring correct hierarchy on first load
- Collaborated via feature branches and PR review; validated with unit, integration, and Playwright end-to-end tests

homeAid - Home Repair Matching App (Hackathon) | *Miro, AI-Assisted Prototyping*

Jun 2026

- Led UX for a two-sided app matching aging homeowners with repair workers: 18 screens in 5 hours, including an in-app budget-negotiation flow; pitched to 6 judges

SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL, PHP, C, C#

Frameworks: React, Next.js, Node.js, Express, Framer Motion, HTML/CSS

Tools & Platforms: Linux, Git/GitHub, Docker, MongoDB, SQL Server, Android Studio, Playwright

Design: Figma, Prototyping, Wireframing, User Flows, Design Systems, Accessible Design

LEADERSHIP

President

May 2026 - Present

SBU Badminton Club

- Lead a **170+ member** club; run practices and lead a 20+ player team at tournaments against schools nationwide

Vice President & Graphic Designer

Nov 2024 - Present

BURSA (Burmese Student Association)

- Direct visual identity for a 600+ follower cultural org: event branding, flyers, and social graphics
